COURSEWORK

Data Structures
Advanced Data Structures & Algorithms*
Software Engineering*
Web Application Development*
Network Protocols*
Computer Organization & Assembly*

* In progress · Fall 2026

ABOUT ME

Computer science student building practical, user-facing software through full-stack web, desktop, and data-focused projects. Seeking a Summer 2027 software engineering or related technical internship.

PROJECTS

MacroCoach | Fitness & Nutrition Analytics

Python · FastAPI · SQLAlchemy · SQLite · Java Swing

- Built a REST API to log bodyweight, nutrition, and user targets, using SQLAlchemy models backed by SQLite.
- Developed a Java Swing desktop client with summaries, rolling averages, and progress trend views.

StatSide | Sports Analytics Web App

React · JavaScript · Vite · CSS · REST APIs

- Created an interactive React app to compare professional football teams and players using API data.
- Designed responsive, card-based comparison views driven by user selections.

Formula 1 Data Visualizer

Python · Requests · JSON · Matplotlib

- Retrieved race and driver statistics from an external API, parsed responses, and generated visualizations.
- Added sorting, filtering, and chart selection to explore performance metrics.

TECHNICAL SKILLS

Languages Python, Java, JavaScript, HTML, CSS

Web & Backend React, Vite, FastAPI, REST APIs, Pydantic

Data & Tools SQLAlchemy, SQLite, PostgreSQL, Git, GitHub, Matplotlib

EXPERIENCE

Raising Cane's Chicken Fingers | Crew Member & Trainer — 2021–Present

- Train new team members on procedures, workplace safety, and customer service expectations.
- Coordinate with teammates and managers to maintain accuracy during high-volume shifts.

South Texas Youth Soccer Association | Soccer Referee — 2018–2021

- Officiated youth matches, applied rules, and communicated decisions clearly with players, coaches, and parents.
